## Ambulatory Staffing Services

### **How are you meeting staffing demands in this challenging environment?**

With 10,000 people turning 65 every day, the prevalence of chronic disease, an aging healthcare professional population, and an increased demand for convenience and access to care, the need for innovative ways to staff ambulatory settings is growing. An increase in patient days and visits can help your bottom line, but it can also challenge your ability to quickly and adequately staff your facility with high-quality, experienced healthcare professionals.

### **Turn to AMN Healthcare to meet your staffing needs**

Maintaining staffing levels is key to meeting increased patient demands and expectations. So it's critical to have a staffing partner you can trust. AMN provides you with the most comprehensive pool of pre-screened and highly trained healthcare professionals to fill your ambulatory staffing needs, including permanent or temporary assignments. With more than 30 years of industry experience, we truly understand what it takes to staff your organization for sustainability and long-term success. Contact us today!
